

## METALOGIX CONTENT MATRIX EMAIL EDITION

# Migrate Email to the Cloud

The most powerful tool for Office 365 and hosted Exchange Migration and Management

### Plan Ahead

Content Matrix Email Edition is a powerful, feature rich, email migration solution for organizations moving Exchange to Office 365 or any other cloud. There are many factors that need to be considered before moving business critical email data from the ground to cloud. Without proper tools and planning, the complexity of such a migration can lead to lengthy and often costly projects. Content Matrix, Email Edition, has been designed to make the move to the cloud as smooth and effortless as possible.

### Manage the Move

Migrating sensitive email content while maintaining zero downtime and platform coexistence is a balancing act that needs to be managed carefully. Content Matrix Email Edition migrates all Exchange content from the source environment, including calendar and mailbox information and also offers O365 mailbox provisioning on the fly. Administrators can apply granular filters to each user and manage both existing and new Exchange environments in real time using the unified “source and target” interface. An advanced tool set pro-

vides comprehensive reporting and job statistics.

### Search and Discover

Content Matrix Email Edition also greatly simplifies the process of working through staged migrations. It maintains a true hybrid Exchange Server deployment, and allows search and discovery across the on-premises and Office 365 environments. The whole move is carried out using the multi award-winning migration engine that connects directly to O365 using Fast Stream and the Exchange Web Services (EWS) API.

### Advanced Migration Filters

Content Matrix Email Edition can also carry direct one-hop migrations from Exchange and provides the option to migrate directly into the in-place archive mailbox in Exchange 2013 for organizations that need to keep archived emails separately in the cloud. Emails are filtered by age, size and message class during the pre-migration phase. This helps decrease storage requirements and improve performance in the cloud.

### Make the Move to the Cloud

Whether you’re moving from Exchange, Exchange Online or Third Party Archives, Content Matrix Email Edition migrates all your content to O365 and other clouds.

## Tech Specs

### Source Systems

- MS Exchange, Exchange Online

### Target Systems

- Office 365, Hosted Exchange, MS Exchange

### Speed and Fidelity

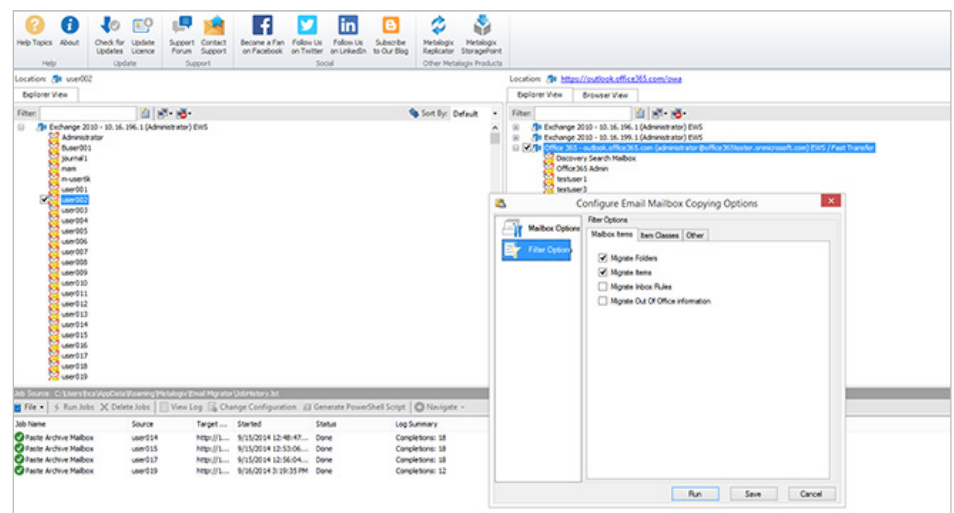

Metalogix Content Matrix Email Edition migrates email from Microsoft Exchange to Office 365 and any other Cloud. It reduces the complexity of standard email migration procedures and improves speed and fidelity using Fast Transfer Stream technology. Email is copied straight from the source and written directly into MS Exchange in Office 365 or any other cloud. The tool provides advanced content filters and provisions Office 365 mailboxes. Content Matrix Email Edition does not require any software or agents to be installed on the target or source Microsoft Exchange servers. Content Matrix Email Edition maintains total platform co-existence and complete end user transparency.

### Easy Installation, Configuration and Administration

Content Matrix Email Edition is easy to install and configure. It is designed to connect directly to the existing email platform and provide as much out-of-the-box functionality as possible. The entire migration process can be managed through the unified source and target interface. Content Matrix, Email Edition ensures high-fidelity, high-speed migrations.

### Zero Downtime

Its business as usual for end-users. Content Matrix, Email Edition migrates email and provisions new cloud mailboxes on the fly, providing a positive migration experience for both end users accessing their mailbox or IT Admins migrating large volumes of mail.

### About Metalogix

Metalogix provides industry-recognized management tools for mission-critical collaboration platforms. These tools are engineered and supported by experts committed to the rapidly evolving deployment and operational success of our clients.

Metalogix' world-class tools and client service have proven to be the most effective way to manage increasingly complex, and exponen-

tially growing metadata and content across collaboration platforms.

For over a decade, Metalogix has developed the industry's best and most trusted management tools for SharePoint, Exchange, and Office 365, backed by our globally acknowledged live 24x7 support. Over 14,000 clients rely on Metalogix Tools every minute of every day to monitor, migrate, store, synchronize, archive, secure, and backup their collaboration platforms.
